

**24th May 2018**

**'The Journey of Plastic'**

Next term our whole school summer project is investigating the impact of plastic on the environment, this links to our whole school theme of Journeys.

We would like children to think about this project over the half term and create a homework project related to the theme. The project could be:

- A poem
- A sculpture
- A newspaper report
- A journal of all the plastic used in your home
- A story about plastic
- A power point presentation about plastic
- A video about plastic use in your area or a film about plastic
- A collection of plastic photographed or drawn
- Art work depicting the impact of plastic in the environment
- Products made out of plastic e.g. bags, chairs, tables, clothes, fabrics,
- Posters to raise awareness of the use of plastics
- A project researching the impact of plastic on the environment including the impact on wildlife
- Create a book/poster to show the ways we can reduce the amount of plastic we use.
- Research what inventions and scientific discoveries are being made to reduce the amount of plastic
- The history of plastic use.
- Invent your own machine to get rid of the plastic in the ocean.

Choose one of these ideas or think of your own.

Please bring in your projects after half term. The best project will win a prize and be part of the summer exhibition. We look forward to seeing them.

Have a lovely half term.

*Ms Anna Jeffery*
